TechCon 365 | DALLAS

DELEGATING REAL WORK TO COPILOT COWORK

Copilot just got a promotion — from answering questions to finishing work

April Dunnam | Principal Cloud Advocate, Microsoft

TechCon 365

DALLAS

SESSION GUIDELINES

ALLOWED

PHOTOGRAPHY DURING THE SESSION

Feel free to capture the moment! Taking pictures of the presentation during the session is perfectly fine.

ENCOURAGED

SELFIES WITH THE SPEAKER

We encourage interaction! If you'd like a selfie with the speaker, don't hesitate to ask. Most speakers will be happy to oblige during appropriate breaks.

NOT PERMITTED

RECORDING & LIVE STREAMING

Recording or live streaming the session, in part or in full, is strictly prohibited. Thank you for respecting our content and speakers.

TechCon 365 | DALLAS

TechCon 365 | DALLAS

TODAY'S SESSION

Agenda

Lots of live demos — 7 of them

01 **Copilot got a promotion**
From answering questions to finishing work

02 **For end users**
What to delegate and how to stay in control

03 **For IT**
Under the hood, and the governance levers

04 **Ready for rollout + Q&A**
Checklist, your first week, your questions

TechCon 365 | DALLAS

PART 1

Copilot got a promotion

From answering questions to finishing work

TechCon 365 | DALLAS

Know your modes of work

Sort by how much of the work you hand over

YOU STEER EACH TURN

Copilot Chat

Quick questions, lookups and drafts

Also gaining long-running tasks with approvals (Frontier, Oct)

YOU DELEGATE

Copilot Cowork

Plans multi-step work, acts as you, asks before sensitive actions

Generally available

IT WORKS AS ITSELF

Autopilot

A teammate with its own identity, memory and computer

Formerly Scout · private preview expanding end of Oct 2026

MORE OF THE WORK HANDED OVER →

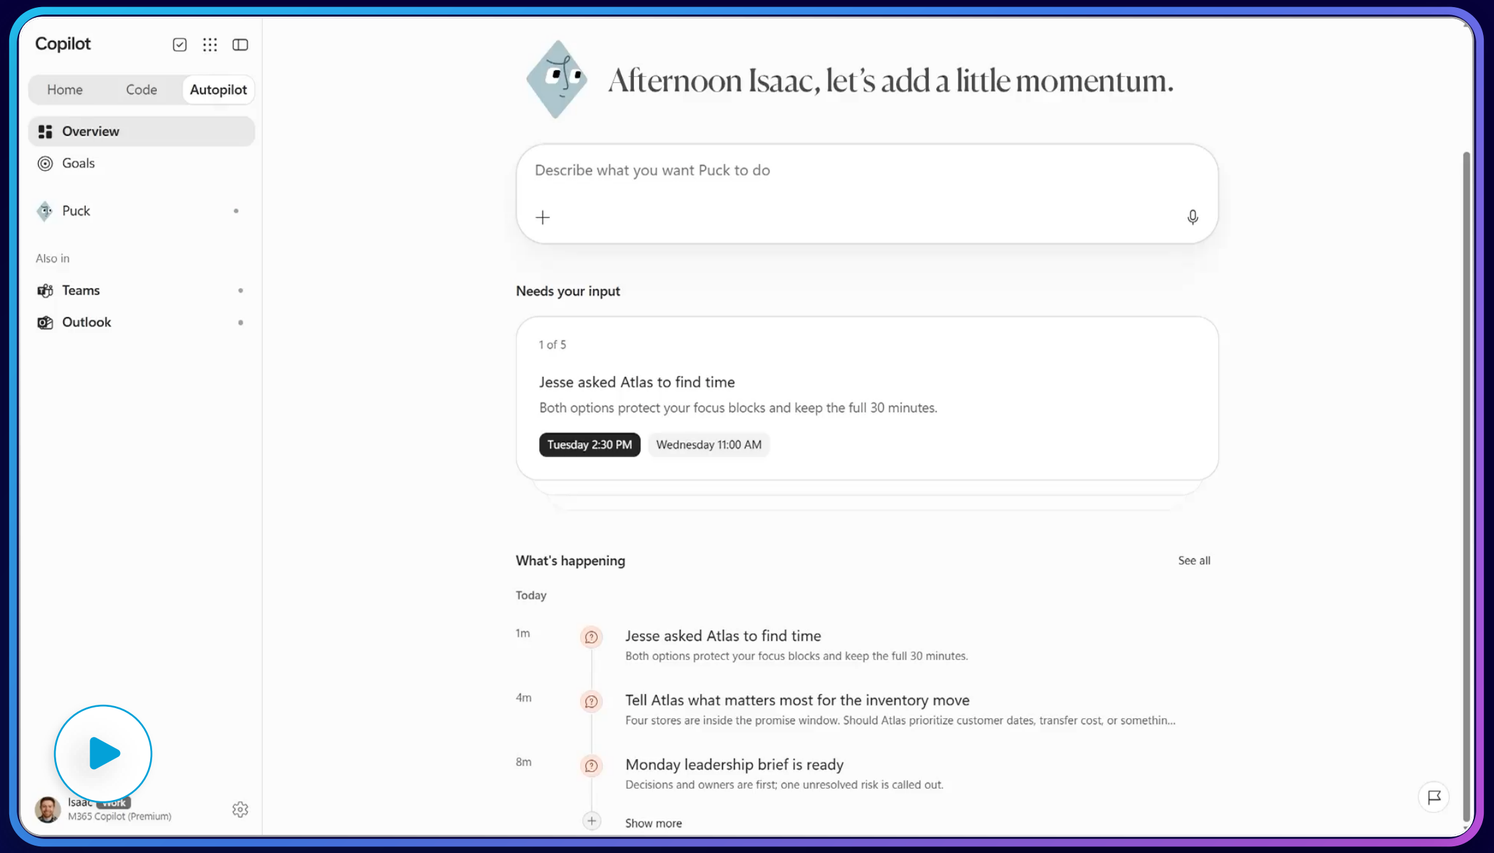

ASSIST	DELEGATE	BUILD	AUTOMATE
Copilot Chat	Copilot Cowork	Copilot Code & Studio	Autopilot

In every mode, people set the direction and stay accountable.

TechCon 365 | DALLAS

Autopilot

Your secure digital teammate that proactively works for you

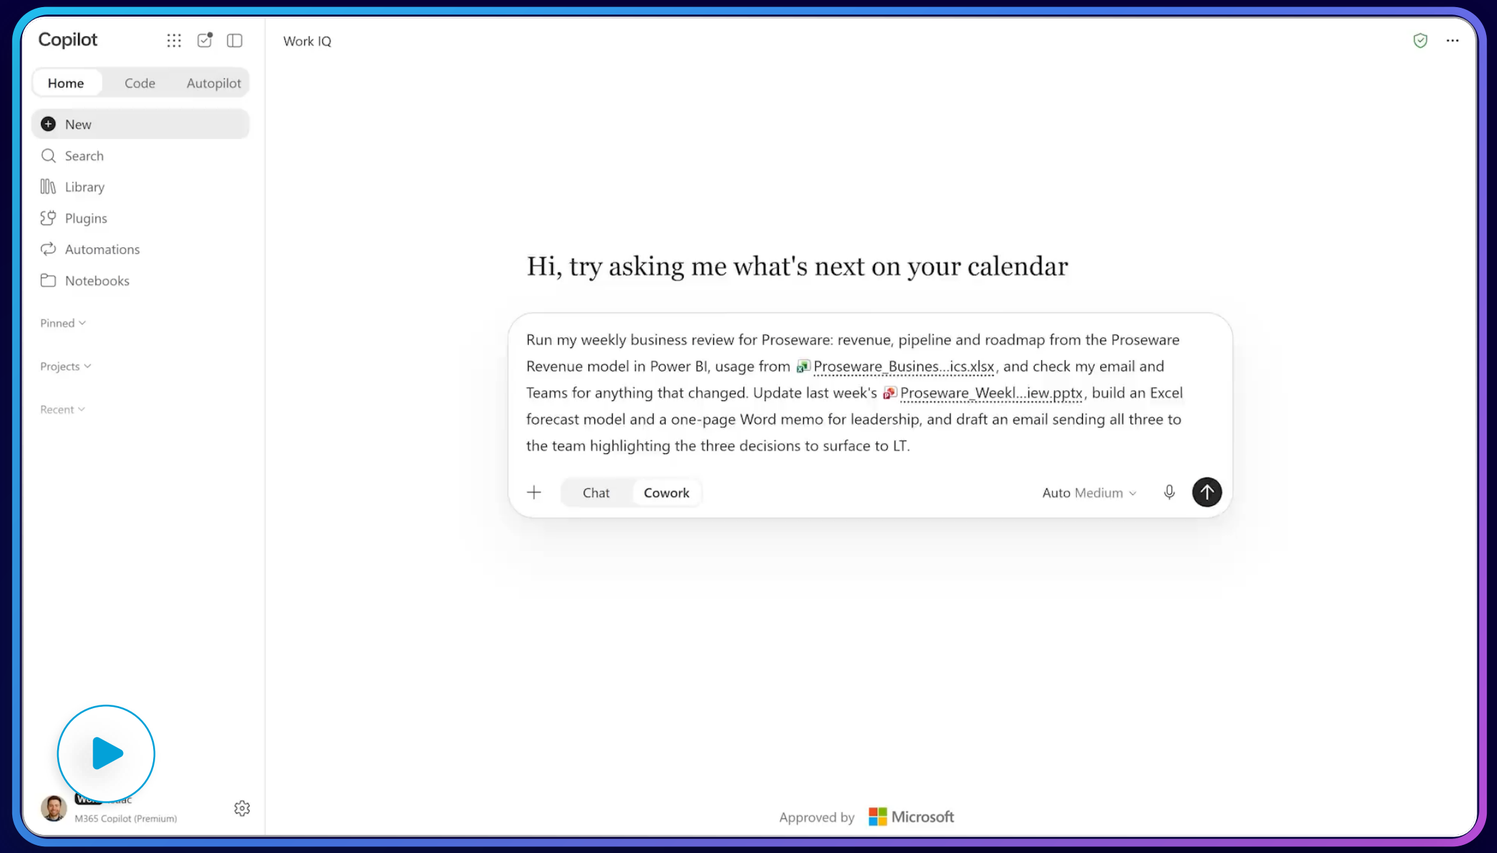

PRIVATE PREVIEW

- Always on, moving work forward across Microsoft 365
- Proactive help, with enterprise trust built in
- Work that stays visible and governable

TechCon 365 | DALLAS

Cowork

Delegate complex work and get to outcomes faster

GENERALLY AVAILABLE

- From goal to finished work, delegated
- Fits how your team works: Cowork you can extend and customize
- Hand off the work, keep control of the outcome

TechCon 365 | DALLAS

You describe the outcome

Cowork does the work and checks in with you along the way

01

Describe

The outcome you want, in plain words

02

Plan

Writes a plan before it touches anything

03

Ground

Work IQ: your mail, meetings, files and chats

04

Act

Across Outlook, Teams, Word, Excel and SharePoint

05

Check in

Asks for approval before sensitive actions

06

Deliver

Finished files, saved to OneDrive

Less chat assistant, more a colleague who takes a task and comes back with a draft.

TechCon 365 | DALLAS

What’s landed in Cowork

Preview in April, generally available June 16, 2026 and it hasn’t slowed down

APR–MAY

- Plugins and custom skills
- Mobile app

JUN 16

- Generally available
- Customize and skill builder
- Brand templates and images

AUG

- Event-driven tasks
- Local browser use: GA
- Workspace files for plugins

SEP

- App skill (Frontier)
- Edit existing Office files
- Reasoning effort dial

OCT

- Projects
- Past chats and tasks
- Connectors and event triggers

TechCon 365 | DALLAS

DEMO · Q4 LAUNCH

Hand off a real task

Q4 launch kickoff: prep → briefing packet → follow-up email, one approval

PROMPT

“For my Q4 launch kickoff meeting, build a briefing packet: review related emails and notes from our prior meetings, include action items and talking points, save it as a Word doc, and draft a follow-up email to attendees. Show me before sending.”

WATCH FOR

- The plan it writes before it starts
- Skill chips: Email, Meetings, Word
- Grounding in real people, threads & files
- Approval card: risk level, preview, Send / Cancel
- Finished Word doc in OneDrive

TechCon 365 | DALLAS

PART 2 · FOR END USERS

Delegate like a manager

What to hand over, how to brief it and how to stay in control

TechCon 365 | DALLAS

Stop prompting, start delegating

Prompting

THE OLD HABIT

- Craft the perfect wording
- Plan every step yourself
- One app at a time
- Follow up manually
- Start over when it’s off

Delegating

THE COWORK WAY

- Describe the outcome you want
- It plans the steps and shows you
- Works across apps in one task
- Schedule it and let it repeat
- Iterate in the same thread

The skill isn’t the perfect prompt anymore. It’s a clear handoff.

TechCon 365 | DALLAS

What’s worth delegating?

Delegate

HAND IT TO COWORK

- Multi-step, cross-app work
- Produces an artifact: doc, deck, workbook, brief
- Repeats every week
- Bulk reading + reasoning (35 contracts)
- Web tasks that need your sign-ins

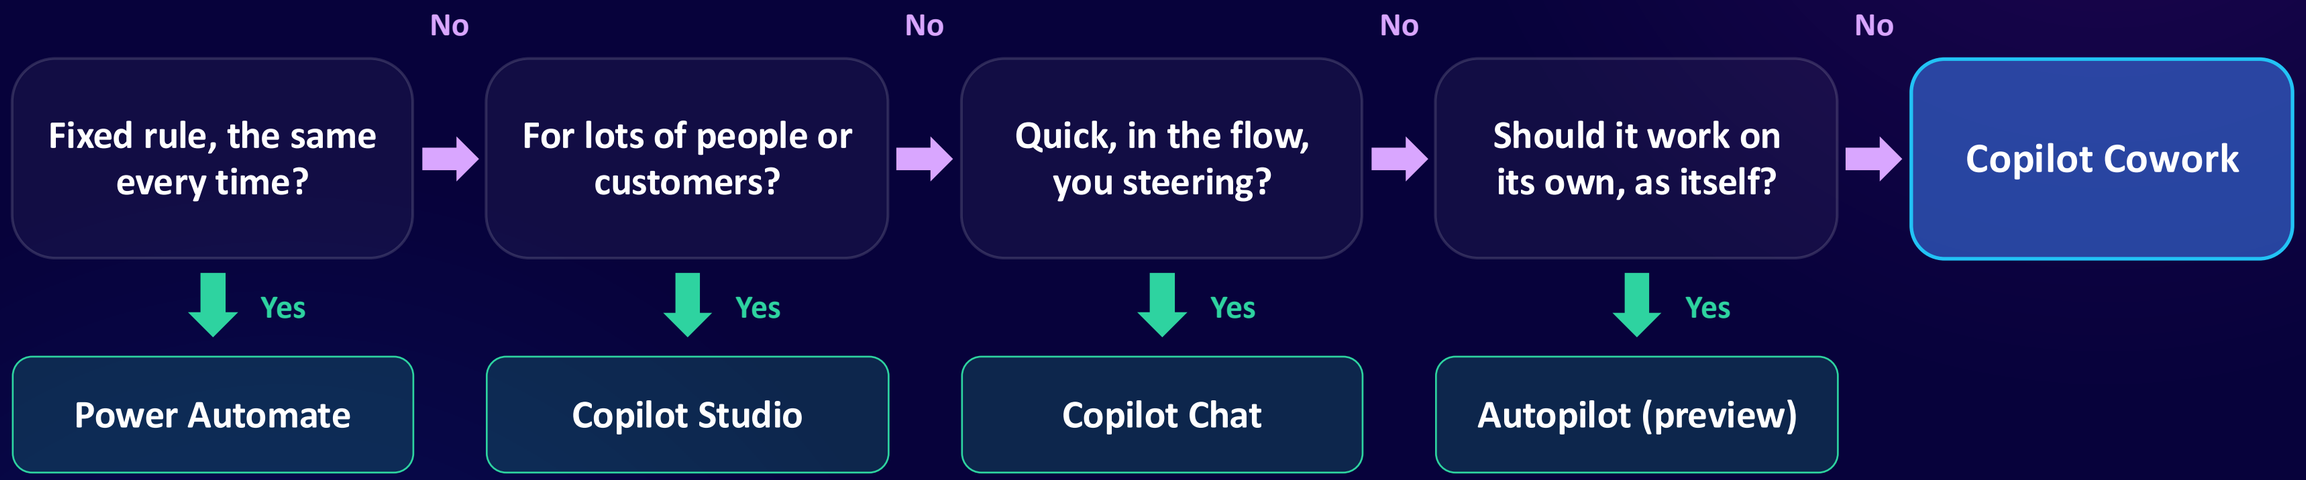

Keep or route elsewhere

NOT EVERY TASK IS A COWORK TASK

- One-step edit in the app you’re in
  → **Chat or in-app Copilot**
- A fixed rule, the same every time
  → **Power Automate**
- For hundreds of people or customers
  → **Copilot Studio**
- High-stakes judgment you can’t verify
  → **You**

TechCon 365 | DALLAS

Which one do I reach for?

CHAT OR COWORK? RULE OF THUMB

If you'd steer every step, use Chat. If you'd hand over the outcome, use Cowork.

Chat is in your license. Cowork is billed in credits, so pick wisely.

Repeats? Save it as a skill then automate it.

TechCon 365 | DALLAS

Copilot and Cowork are Better together

Think and prep in Chat, then hand the finished brief to Cowork.

STEP 1

Think in Chat

Brainstorm, outline, and pressure-test with Chat.

STEP 2

Save the prep

Save the outline or criteria as a file in OneDrive.

STEP 3

Hand off

Point Cowork at the file and describe the outcome.

STEP 4

Polish in-app

Tweak the result in Word or PowerPoint with Copilot.

WHY IT WORKS

CHEAP THINKING
Chat is in your license

FEWER WASTED CREDITS
A clear brief avoids rework

YOU STAY IN CONTROL
Review the plan before it runs

TechCon 365 | DALLAS

The delegation ladder

1

Quick wins

ONE AND DONE

- Rebalance your week and protect focus time
- Wrap up a project into one clean folder
- Turn a dense doc into a one-page brief

2

Everyday workflows

EVERY WEEK

- Catch up on messages, draft replies
- A weekly status that writes itself
- Newsletters into one curated brief
- Prep for every important meeting

3

Hard problems

WOULD TAKE YOU A DAY

- A complete out-of-office handoff
- Audit dozens of files against a standard
- A 30-60-90 onboarding plan for a new hire
- Patterns across a month of meetings

TechCon 365 | DALLAS

Anatomy of an intent Cowork can act on

Goal

The outcome, in one line

Sources

The files, people or date range

Format

Length, structure, tone, where to save

Boundary

What to preview, when to ask you

REAL EXAMPLE

For my 2pm with Contoso, build a briefing packet.
Use the last 6 months of email with them and our prior meeting notes.
Give me 3 talking points and save it as a Word doc in /Meetings/.
Show me before you create anything.

TechCon 365 | DALLAS

Stay in control while it runs

01 **Read the plan**
It shows the steps before it touches anything

02 **Approve with a preview**
Risk level for medium/high-risk actions · the button matches the action (Send, Post)

03 **Interrupt, pause, resume or cancel**
Add context mid-run or stop the task

04 **Check the side panel**
Progress, input & output files, active skills, scheduled prompts, approved permissions

05 **Treat outputs as drafts**
Review before you send or share

“Skip future prompts for similar actions” is convenient but use it deliberately.

TechCon 365 | DALLAS

DEMO

Human in the loop, for real

Approve, edit, cancel, interrupt and an existing Excel file edited in place

PROMPT

“Go through my unread email from the last 3 days. Flag anything urgent (Q4 launch first), draft replies to the quick ones and send routine acknowledgments after I approve them. Update the ‘Open Asks’ tab in my Tracker.xlsx in OneDrive with anything I owe people.”

WATCH FOR

- The plan before it starts
- Approval cards + risk levels
- Approve one, edit one, cancel one
- Interrupt: “skip vendors”
- Tracker.xlsx edited in place + version history
- Fuzzy ask → refine in the thread

TechCon 365 | DALLAS

Make it repeat

Do it once, keep it forever

STEP 1

Do the task

Talk it through until the result is right

STEP 2

“Save this as a skill”

Captures the steps and format as a SKILL.md

STEP 3

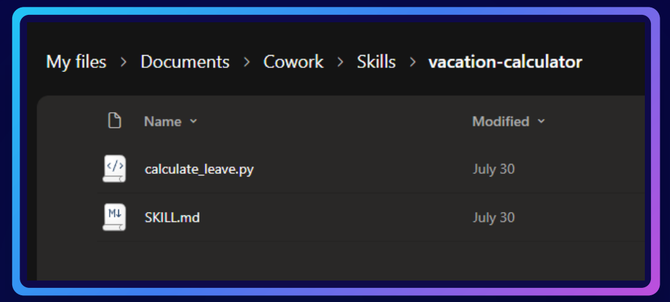

Automate it

On a schedule or when an event happens

STEP 4

Keep it in a Project

Chats, tasks, files and instructions in one place

- A skill is a SKILL.md file in OneDrive › Documents › Cowork › Skills
- Up to 50 custom skills per person
- Custom instructions (Preferences): up to 20 KB, applied to every task

TechCon 365 | DALLAS

Anatomy of a SKILL.md

skills/friday-status/SKILL.md

```
---
name: friday-status
description: Drafts my weekly status from
  the last 7 days of email, Teams and
  meetings. Use when I say "Friday status"
  or "weekly update".
---
# Friday status
1. Pull my sent mail, Teams chats and
   meetings from the past 7 days.
2. Group into Wins, In progress, Blockers.
3. Max 5 bullets per section.
4. Use references/template.docx.
5. Save to /Status/ and show me
   before sending.
```

- **Folder name = name field**
  Kebab-case, and they must match — the #1 reason a skill won't load
- **The description is the trigger**
  Write the phrases you'll actually say
- **The body is the playbook**
  Steps, format, tone, and where to save
- **Boundaries go in writing**
  Tell it when to stop and show you
- **Skills can run code**
  Ship a script, like calculate_leave.py, for exact math

TechCon 365 | DALLAS

DEMO

Put it on repeat

Turn it into a skill, then let it run every weekday

PROMPT

“Save what you just did as a skill called inbox-triage.” → “Every weekday at 7am, run inbox-triage and send me a one-page brief in Teams.”

WATCH FOR

- SKILL.md lands in OneDrive
- Automations: scheduled + event-driven
- Approval by default for automated sends
- Credit usage & remaining credits
- Pause, edit or delete an automation

TechCon 365 | DALLAS

Automations vs Autopilot

Automations

COWORK · SCHEDULED + EVENT TASKS · GA

- You define the task and the trigger
- Runs as you, with your permissions
- Sends still need your approval
- Starts on a schedule or an event
- Best for repeatable work you own

Autopilot

AUTOPILOT · PRIVATE PREVIEW

- You set the goal and guardrails
- Its own identity, memory and computer
- Learns your priorities over time
- Works with people and agents
- Activity visible and governable

Automations repeat a task you defined. Autopilot owns an ongoing goal.

TechCon 365 | DALLAS

Projects: set the context once

1

Instructions

Audience, format and terms, applied to every task in the project

“Write for the exec team: one page, bullets, risks first.”

2

Context

Files, past chats and tasks via the context picker, no re-explaining

“Use the launch plan and last week’s status report.”

3

Outputs

Every file the project’s tasks create, in one tab, saved in OneDrive

Tabs: Recent · Outputs · Project context

Rolled out in Cowork Oct 20 · private to you · instructions override your global preferences · Chat + Cowork in Home: Frontier by mid-Nov

TechCon 365 | DALLAS

DEMO

Give the work a home

A Project with instructions and files then a task that uses them unprompted

PROMPT

In a new ‘Q4 Launch’ project: “Draft this week’s launch status update from the project files and my recent email, and save it as a Word doc.”

WATCH FOR

- Instructions applied without asking
- Add files + move in an existing chat
- Outputs tab collects every file
- Private to you: share files, not the project

TechCon 365 | DALLAS

Skills, connectors, plugins: think kitchen

1

Skill = the recipe

KNOW-HOW

Tells Cowork how and when to do a task. A folder with a SKILL.md file.

2

Connector = the pantry door

REACH

Live data and actions from your systems, through a remote MCP server.

3

Plugin = the meal kit box

PACKAGING

Recipes and pantry access packed together — shipped and governed like an app.

TechCon 365 | DALLAS

Plugins: install the know-how

1

What’s inside

Skills + MCP connectors in one package. Find them in Plugins, or + › Skills (mobile too).

“A skill is a capability; a plugin is how capabilities ship.”

2

What’s ready-made

Dynamics 365 Sales, Service & ERP · Fabric IQ · Finance, Capital Markets, Legal, Education

Partners too: Salesforce, ServiceNow, Jira, SAP, Workday, Zendesk

Example skills: meeting-prep, pipeline-prioritizer, case-triage, review-contract

3

Who’s in control

Admins deploy, scope or block plugins under Agents › Tools in the admin center.

Dynamics plugins need a Power Platform environment.

TechCon 365 | DALLAS

Ship your skills as a plugin

1

Write the skill

A skill is a SKILL.md folder Cowork loads when a request matches — save one from a task you did well.

“Save this as a skill.”

2

Package a plugin

A plugin is an app package (.zip): a manifest, your skills and optional MCP connectors.

Same package format as Teams apps and Copilot agents.

3

Deploy to your org

An admin uploads it in the Microsoft 365 admin center and picks who gets it.

Users find it under Plugins or + › Skills.

A few colleagues? Share the skill from Customize. **The whole org?** Package a plugin for admins to deploy.

TechCon 365 | DALLAS

DEMO

Projects meet plugins

Cowork builds where your team already works

PROMPT

In the ‘Q4 Launch’ project, using the Miro plugin: “Read the launch plan and risk tracker, then build a Miro board for Thursday’s kickoff workshop — a flowchart of the launch workflow and a sticky-note risk wall grouped by owner. Share the link.”

WATCH FOR

- Miro plugin switched on from the + menu
- Project files become the board’s content
- Flowchart and sticky notes built live
- Miro sign-in, approval before it acts

TechCon 365 | DALLAS

Triggers and connectors

Event triggers

NOT JUST ON A SCHEDULE

- On a schedule or when something happens
- Describe what to watch for; Cowork proposes the automation
- Runs as you, with approval by default for sends
- October added more triggers, including non-Microsoft ones

Copilot connectors

BRING DATA IN

- Index data for search & grounding
- Not real-time, read-only
- Supported in Cowork (Oct)

Cowork connectors

REACH OUT LIVE

START HERE

- A remote MCP server
- Live data and actions
- Read-only or read/write tools

Power Platform connectors

PREBUILT ACTIONS

- 1,400+ prebuilt APIs
- Power Apps, Automate, Studio
- Supported in Cowork (Oct)

TechCon 365 | DALLAS

More ways to work

Small switches and habits that change how Cowork feels

01

Customize

Guided skill builder; upload or share skills and plugins

02

Models

Auto is the default. Pick a model, or set effort Light to Max.

03

Context

Attach files or use a Project so it skips the search.

04

On mobile

Check in and approve from iPhone or Android

05

Look & feel

Brand templates and image generation for finished files

Mostly switches, not projects.

Find them in Customize, the model and effort picker, and the mobile app. Apps now live in their own Apps tab in Copilot.

TechCon 365 | DALLAS

Let it handle the website

Browser use · generally available · requires Microsoft Edge

01

You ask

“Fill out this form”

02

Hidden Edge tab

Opens in the background, on your device

03

Acts as you

Uses your own sign-ins (SSO)

04

Hands off

Shows you the tab for MFA or CAPTCHA

05

Delivers

The finished submission

Your credentials never leave your device.

Browser tasks inherit your Conditional Access, DLP and tenant browsing policies and admins control the Cowork Browsing setting.

TechCon 365 | DALLAS

DEMO

Browser use

A real Microsoft Form, filled in for you

PROMPT

“Fill out the Risk Intake form for the top 3 risks in my risk workbook.”

WATCH FOR

- A hidden Edge tab — on my device
- Hand-off for sign-in / MFA
- Approval before each submit
- Plan B: the recording

TechCon 365 | DALLAS

The level-up ladder

Prompt → skill → shared skill → plugin

LEVEL 1

Prompt it

Do the task once and get the result right

LEVEL 2

Save a skill

“Save this as a skill” — a SKILL.md you can reuse

LEVEL 3

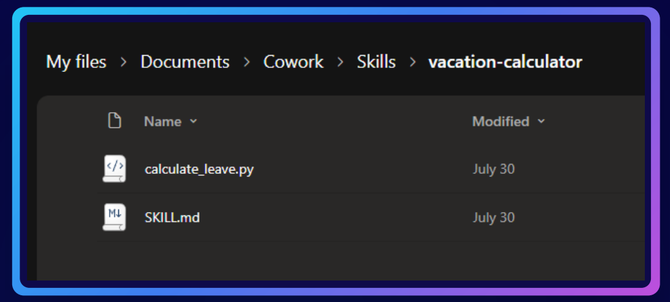

Share a skill

Send it to a few colleagues from Customize

LEVEL 4

Ship a plugin

Bundle skills and live connectors for your whole org

- A skill is a SKILL.md file in OneDrive › Documents › Cowork › Skills
- Up to 50 custom skills per person
- Share from Customize — or package skills and connectors as a plugin admins govern

TechCon 365 | DALLAS

Is it worth the credits?

Compare the credits to the minutes you get back.

The break-even test

Price the task

Credits × $0.01. Light ≈ $1–3, medium ≈ $3–7, heavy $7+.

Price your time

At $60 an hour, a minute is worth $1.

Compare

A $5 task pays off if it saves 5+ minutes.

TASK	COWORK	BY HAND	VERDICT
Customer meeting prep	**~$2**	20 min	Worth it
Triage inbox, draft replies	**~$2**	30 min	Worth it
Weekly status report	**~$5**	45 min	Worth it
Review 35 contracts	**$10+**	6+ hours	Worth it
Reword one paragraph	**~$1**	2 min	Use Chat

Illustrative numbers — swap in your own. Credits at $0.01 each (check the current rate).

TechCon 365 | DALLAS

An honest scorecard

Where it impresses

DELEGATE WITH CONFIDENCE

- Cross-app gathering in minutes
- First drafts of docs, decks and workbooks
- Bulk reading — with citations
- Recurring briefs
- Web-form drudgery

Where it still needs you

KEEP A HUMAN IN THE LOOP

- Ambiguous or broad instructions
- Stale or incomplete source data
- Long chains of dependencies
- Anything you'd sign your name to — review it
- Custom skills: not validated by Microsoft

TechCon 365 | DALLAS

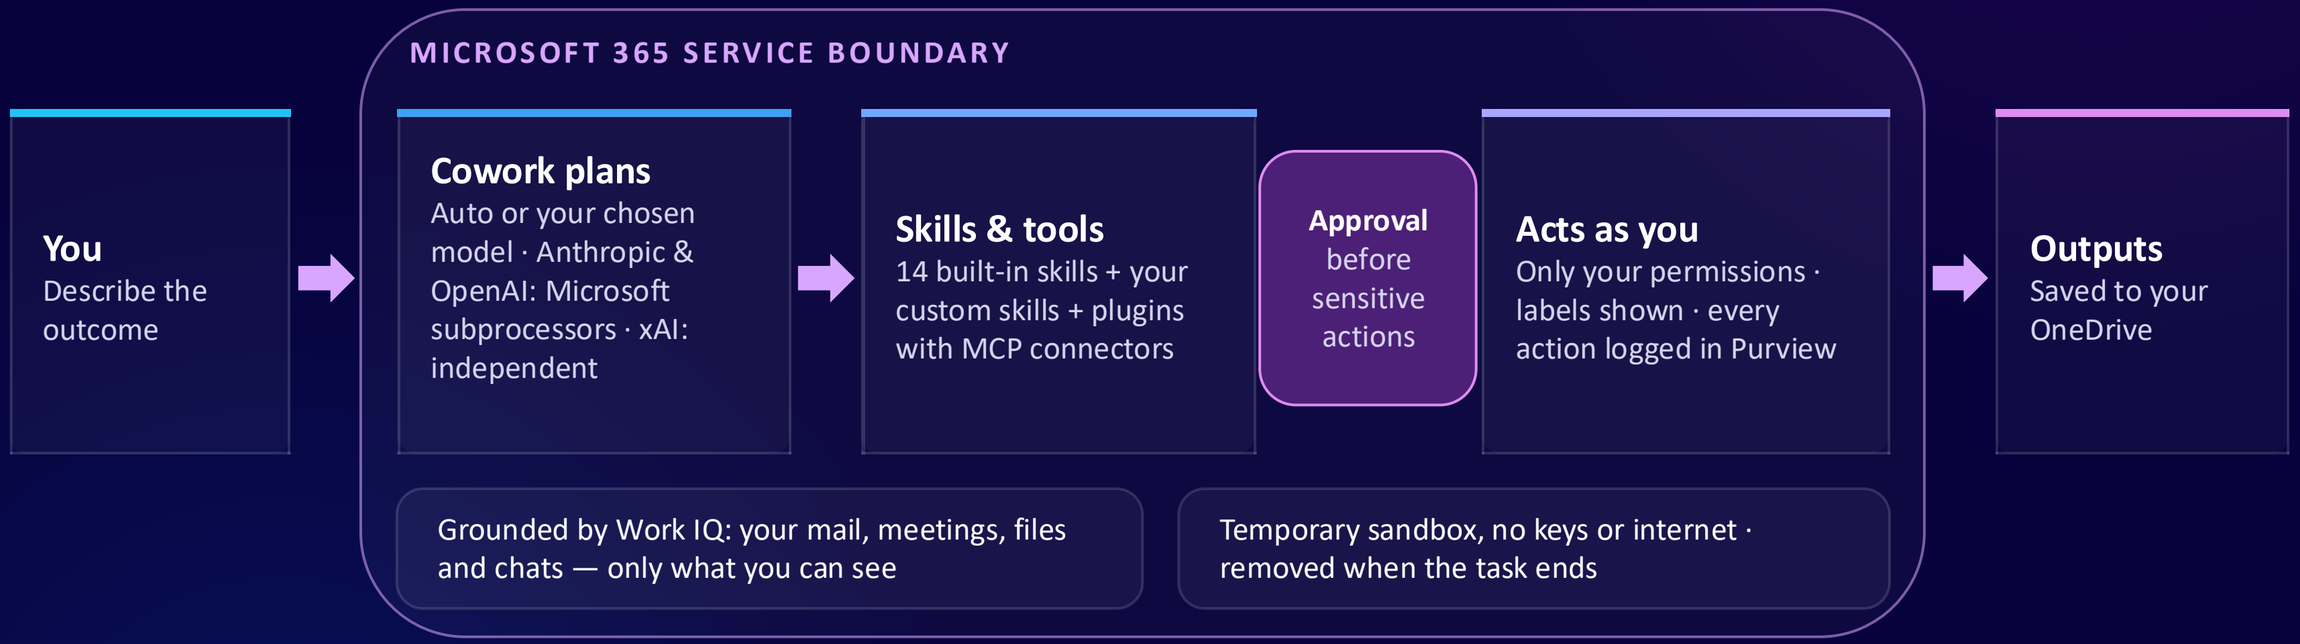

PART 3 · FOR IT

Under the hood

What happens when Cowork runs a task and the levers you control

TechCon 365 | DALLAS

How a task runs, inside your boundaries

BROWSER USE
Runs in Edge on the user's device — inherits CA, DLP and tenant browsing policies

OUTSIDE THE EU DATA BOUNDARY
Anthropic models and Bing web search. Grok 4.7 (xAI) is an independent processor.

TechCon 365 | DALLAS

Models behind Cowork

The host runtime selects the model; the sandbox names a capability, never an endpoint

MODEL	PROVIDER	STATUS AND USE
Claude Opus 5.5	**Anthropic**	Complex, high stakes work
Claude Sonnet 5.5	**Anthropic**	Everyday tasks and fast responses
Claude Fable 5.1	**Anthropic**	Most advanced model for ambitious work (Frontier)
GPT 6 Astra	**OpenAI**	Latest model for tough problems
GPT 6.1 Sol	**OpenAI**	Intelligent and efficient for hard work
GPT 5.6 Terra	**OpenAI**	Balanced effort for common tasks
GPT 5.5	**Azure AI Foundry**	Capable model for medium effort work (Frontier)
Grok 4.7	**xAI (independent)**	Long documents, coding and multi-step tasks

Admins can turn off Anthropic models tenant-wide

Anthropic is outside the EU Data Boundary; off by default in EU and UK

Grok 4.7 is coming

Source: Choose a model for Copilot Cowork, Microsoft Learn · updated 23 October 2026 · Your picker shows only the models your org enables

TechCon 365 | DALLAS

Purview coverage for Cowork

MICROSOFT PURVIEW

- ✓ DSPM for AI
- ✓ Auditing
- ✓ Sensitivity labels
- ✓ Encryption
- ✓ Data loss prevention
- ✓ Insider Risk Management
- ✓ Communication Compliance
- ✓ eDiscovery
- ✓ Data Lifecycle Management
- ✗ Data classification
- ✗ Compliance Manager

AUDITED COWORK EVENTS

- A user starts a new Cowork conversation
- Adds, removes or shares a skill or plugin
- Runs a scheduled prompt
- Starts a browser task
- Uploads a file to Cowork
- Cowork creates an artifact in OneDrive

✗ = supported for Copilot Chat, not (yet) for Cowork

TechCon 365 | DALLAS

How skills load, and what controls them

A skill has no permissions of its own: it loads on demand, and controls sit around it.

STEP 1
Skill folder
SKILL.md plus optional files (Agent Skills standard)

→

STEP 2
Session starts
Only name and description are loaded

→

STEP 3
Request matches
Full body loads and Cowork follows the steps

→

STEP 4
Code needed
Scripts run in the isolated sandbox

Layered controls

Contain
Isolated sandbox, your permissions, approvals

Evaluate
Code scan, prompt-injection checks, safety gate

Admin control
All, groups or blocked · Agents › Tools › Registry

Monitor
Purview audit · Insider Risk template

Noteworthy gaps

Personal skills
Admins can’t list, approve or block them

Audit
No built-in vs. user-created flag yet

Sharing
Recipient needs access to run the skill

Approvals
Users can skip repeat prompts for the session

Microsoft Learn: Use plugins with Cowork

TechCon 365 | DALLAS

Admin control levers

01	**Access = spending policy**	Copilot › Cost Management. Anyone in a policy that selects Cowork gets access — even with a 1-credit limit
02	**Request access**	Replaces the old discovery setting · the old agent-based allow list is deprecated
03	**Model families**	Copilot settings: choose which model families are available — this also shapes what Auto can pick
04	**Plugins**	Deploy, scope or block in the Microsoft 365 admin center · unified plugin registry rolling out
05	**Cowork Browsing**	Tenant toggle to turn browser use on or off
06	**Usage & spend**	Consumption dashboard + Cowork usage report (assisted hours, preview)

BEFORE BROAD ROLLOUT

Licenses
Copilot + Credits billing

Allow *.cloud.microsoft
Now copilot.cloud.microsoft

Purview baseline
Audit, labels, DLP, DSPM for AI

Fix oversharing first
Cowork sees what users see

TechCon 365 | DALLAS

What does it cost?

EVERYDAY AI · PER-USER LICENSE (USL)

Copilot Chat, model choice and Auto — covered by the Copilot user license

ADVANCED AI · USAGE-BASED (UBB)

Cowork, Code, Autopilot and frontier models — billed in Copilot Credits (check current rate) · UBB rolling out Q4 2026

TASK SIZE · ROUGH GUIDANCE

Light
100–300 credits
A lookup, a summary, a single action

Medium
300–700 credits
Several sources, structured output

Heavy
700+ credits
Deep research, big data, many outputs

Users see their credit usage, remaining credits and history in Cowork · admins set spending caps per tenant, group or user

TechCon 365 | DALLAS

DEMO

The admin view

Access, models, plugins, audit and usage

WALKTHROUGH

Microsoft 365 admin center › Copilot › Cost Management → spending policy for a pilot group → Copilot settings: model families → plugins: deploy one, block one → Purview audit search → Cowork usage report

WATCH FOR

- “1 credit still grants access”
- Model families shape what Auto can pick
- Deploy a plugin to a group, block one
- Audit events from Demo 2
- Usage report: assisted hours (preview)

TechCon 365 | DALLAS

PART 4 · WRAP-UP

Make it stick

Recap, your first moves, and the badges to earn

TechCon 365 | DALLAS

What we covered

1

Understand it

Four modes of work. Cowork carries a defined outcome through to done.

“Describe the outcome, not the steps.”

2

Use it

Write clear intents, stay in control while it runs, and make it repeat.

“Brief well, approve deliberately, review what comes back.”

3

Govern it

A sandbox with no path out, and every action mediated and audited.

“The absence of a route is the control.”

KEY TAKEAWAY

Delegate the work, keep the judgment.

TechCon 365 | DALLAS

YOUR CALL TO ACTION

Earn your Cowork Collective badges

MISSION 1

Badge Check

Operation Badge Bandit

Track down employees who forgot to badge out and get a styled report in your inbox, with a custom skill.

25 min

MISSION 2

Compliance Packet

Operation By the Book

Turn four compliance documents into an audit package: summary, gap analysis and cover letter.

25 min

MISSION 3

Out-of-Office Handoff

Operation Clean Getaway

Hand off your whole out-of-office checklist in one conversation, with approval before anything goes out.

20 min

microsoft.github.io/agent-academy/cowork-collective

Three missions, about 70 minutes in total

BEFORE YOU START

- Copilot license
- Cowork spending policy
- A permitted model
